HAWK®

HAWK 1.3x SQUEEZE FRONT ANAMORPHIC ZOOMS

Combine the unique characteristics of Hawk 1.3x Squeeze Anamorphic Primes with the convenience of zoom lenses.

Unlike existing anamorphic zooms, the Hawk Front Anamorphic Zoom Lenses place the anamorphic element in front of the spherical elements. The resulting image displays all the anamorphic blur, shallow depth of field, elliptical highlights, streaks and flares, geometric curvature and barrel distortion, and distinct planes of focus cinematographers expect from anamorphic primes.

Hawk 1.3x Squeeze Front Anamorphic Zooms deliver excellent close focus ability, giving cinematographers additional convenience and flexibility on the set.

1.3x

Hawk Front Anamorphic Zoom lenses intercut seamlessly with our entire line of 1.3x Squeeze anamorphic primes. Vantage has brought their uncompromising technical standards, unparalleled design expertise, and precision manufacturing to bear on this addition to the Hawk family of lenses.

Lens	Focal Length/Stop	CfD	Weight	Front Diameter	Overall Length
V-Plus 30-60	30-60mm/T 2.8	0.6m 2'	5.6kg 12.3lbs	142mm	310mm
V-Plus 45-90	45-90mm/T 2.8	0.75m 2'6"	5.3kg 11.7lbs	125mm	280mm
V-Plus 80-180	80-180mm/T 2.8	1m 3'3"	7.6kg 16.8lbs	125mm	430mm
