

Hawk MHX

Hybrid Anamorphic Lenses - Technical Data

Hawk MHX lenses deliver the power of anamorphic while avoiding the limitations of traditional 2x squeeze. They offer super-close focus – almost like macro lenses – with no breathing while focusing. Hawk MHX primes are geometrically well-corrected, yet still preserve classic anamorphic characteristics such as elliptical bokeh and shallow depth of field, resulting in an organic cinematic feel. Hawk MHX lenses deliver their full optical power to new, larger formats. Well-suited for CG.

Patents granted Europe/US/Asia
